Skirting Rubber

Delivering Aussie Excellence

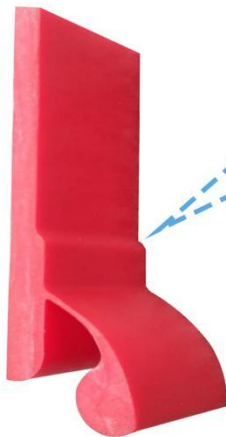

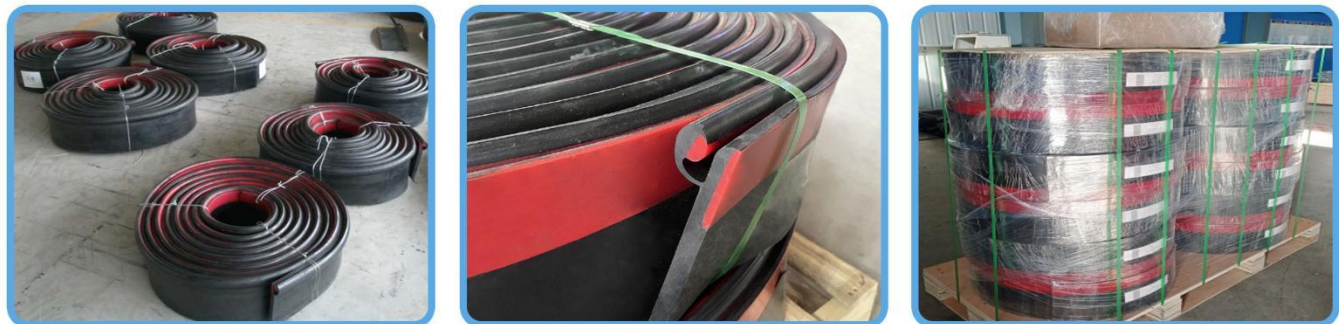

SKIRTING RUBBER

Features of Dual Seal Skirt Board:

- 1.Double-layer structure,better containment and sealing.
- 2.Abrasion-resistant polyurethane parts provide longer lasting performance.

Double-layer structure, with heat retaining inside and dust-proof outside.
The parts where contact the belt is made of polyurethane, which have longer service life and no damage to the belt.
Clamp units are easy to install, adjust and maintain.

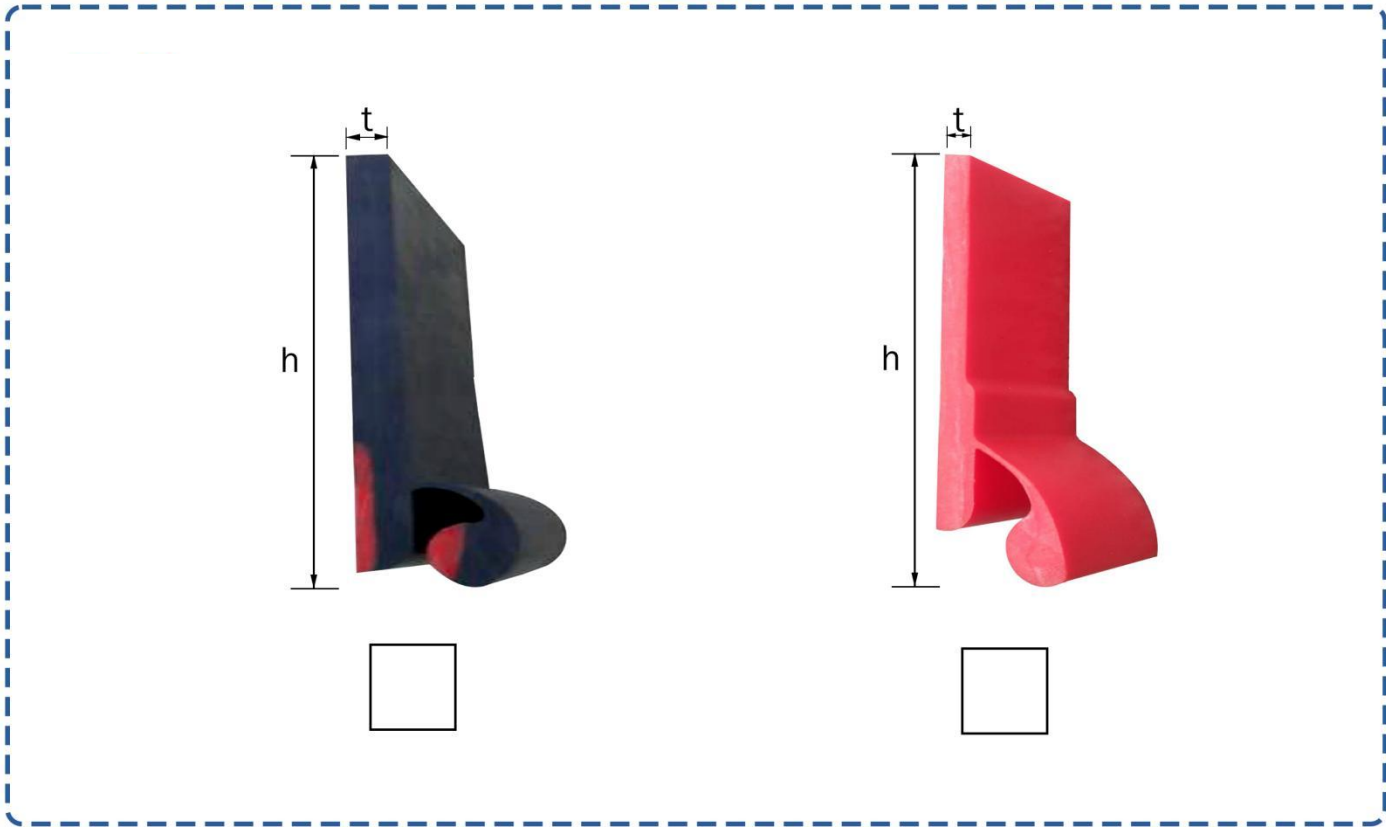

- Double-lips structure, better sealing.
- Cast polyurethane, higher wear resistance than rubber.
- High productivity, better prices.

Dual seal poly skirting is a combination of polyurethane skirt and dual seal rubber skirt. It combines the good wear resistance of poly skirt and the double layer structure of dual seal rubber skirt.This means longer service life and better sealing effect.

Description	Unit	Value
Color		Red, orange,black,green or custom-made color.
Hardness;Shore A	Shore A	63±5, 70±5
Density	g/cm³	1. 25
Tensile	MPa	40
Elongation at break	%	660
Abrasion Loss	mm³@10N	40
Angle Tear Strength(DIE C)	kN/m	57
Trouser Tear Strength(DIE C)	kN/m	23
Temperature Range	°C	-30~70
Rebound	%	43
